Mobilis Collection

Component Cleaning Instructions

Remove cushions, bolsters, and throw pillows to prevent staining of fabric, as cleaners used on polymer resin furniture are not appropriate for fabric. Unsnap back and seat cushions, by gently pulling the snap at the connection to the cushion. Stack on a clean and dry surface.

Apply cleaning solution directly to heavily soiled areas. Using a scouring pad or scrubbing sponge, wipe the entire furniture surface. Heavily soiled areas can be scrubbed with the scouring pad or scrubbing sponge.

Rinse furniture thoroughly with clean water.

Dry thoroughly before installing cushions. Install seat cushions and snap into place. Install back cushions and snap into place. Replace bolsters and throw pillows.

Mobilis Collection

Fabric Care & Cleaning Instructions

To maintain the appearance of your Tropitone furniture, cushions should be cleaned on a regular basis.

Substances such as food morsels and dirt should not be allowed to accumulate and become embedded in the fabric.

For normal cleaning, prepare a solution of 1/4 cup of mild soap per gallon of warm water (less than 100° F / 38° C). Use a soft bristle brush or a sponge to clean the fabric. The soap/water solution may be allowed to soak into the fabric.

Rinse thoroughly with clean water.

Allow cushions to air dry by standing the cushions on their side.

Please refer to the Tropitone Care, Maintenance, Safety & Warranty Information brochure for detailed cleaning and stain removal information.
